

# SPIDER GRAM: PEOPLE & CONNECTIONS MAP

The Spidergram allows you to develop a clearer picture of how all the different people and organisations related both to your work and each other. These might include the people or communities you work directly with; the various bodies from which you receive (or are seeking) funding; or your own peers, local communities and even international support networks.

Based on PEOPLE & CONNECTIONS MAP by diytookit.org. Inspired by Stakeholder Spidergram developed by Helsinki Design Lab. Stakeholder Mapping by Namahn and Yellow Window Service Design, Design Flanders

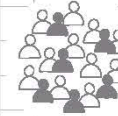

## NETWORK, CONNECTIONS & POTENTIAL COLLABORATIONS

Step 2 allows you to create a map to understand the finer details of engaging with multiple affected groups, collaborators or beneficiaries. It allows you to develop a clearer picture of how all the different people and organisations relate both to your work and each other. These might include the people or communities you work directly with; the various bodies from which you receive (or are seeking) funding; or your own peers, local communities and even international support networks

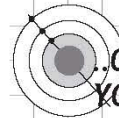

### Mapping your networks

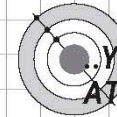

Can you identify people and organizations that are related to your work (for similar topic area, potential collaborations and mutual help)? Write down some of these names here and try to keep in mind what resources they have that you need (Money? People? Decision-making authority?)

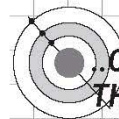

### WHO ARE THE ONES THAT...

**...COULD BE EASILY REACHED THROUGH YOUR CURRENT CONNECTIONS?**

**...YOU CANNOT QUITE REACH YET BUT AIM AT CONNECTING WITH IN THE LONG TERM?**

**...COULD BE REACHED ONLY THROUGH THE SUPPORT OF PEOPLE IN THE PREVIOUS CIRCLE?**
